

We dilligently try to comply, not only with the letter, but also with the spirit of FCC regulations. Our radio stations, like our community, are very conservative with regard to what one might consider to be indecent. The standards we keep are far more strict than those of the commission, because we think it is the appropriate for us to treat our audience with respect.

Particularly for those of us in very small markets, recording the entirety of our programming and archiving the recordings of our entire broadcast day will be a considerable economic burden. The additional labor is also significant for a relatively small staff.

Please consider allowing the burden of such massive recording to fall only on stations that have had a history of actual complaints. Could you spare stations that have never had a serious content complaint or where such complaints are very rare.

I greatly appreciate your considering my thoughts on your pending regulation.

Thank You

Jay D. Austin
